

Pere Marquette River-Fishing Report

August 21st, 2009

Water Conditions — Low 60's - 50's, On the rise with recent rains.

Fishing Conditions — **King Salmon an Dog days of Summer** -- The prized king salmon are starting their spawning run with a few fresh fish entering the Pere Marquette river daily. We have caught some great fish over the past week but we are still waiting for a big push up the river. Stickbaits such as, Thundersticks and Reef Runners have been the top producers in the lower section of river. Trout fishing remains excellent with the night mouse fishing generating some of the larger fish. *Mark*

A great 22 pound king caught a few days ago. Many reports of big fish this year!!!
